DESCRIPTION NOVA 12, 1410, 16, 1810, 2214

Very easy handling - pockets are only placed, where they are really needed (no continuous pocket rows). As no markers or pockets have to be counted, these variations save a lot of time.

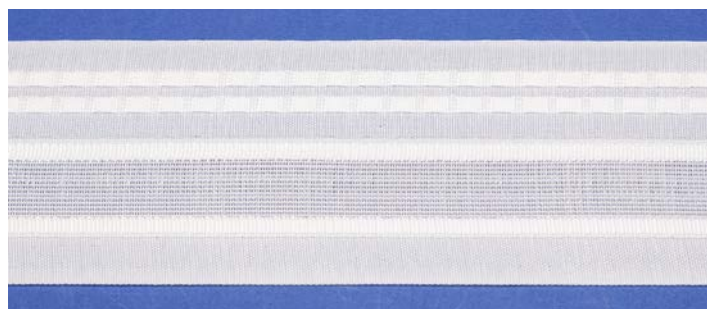

OUR SOLUTION FOR HEAVIER CURTAINS:

VESUVIO WHITE

For **VESUVIO variable** the same description applies as for **NOVA/MAGNUM variable** (see page 1). The pockets have to be counted, however, as there are no markings in the white tape.
